# Overlays

Q: When should I use an overlay?

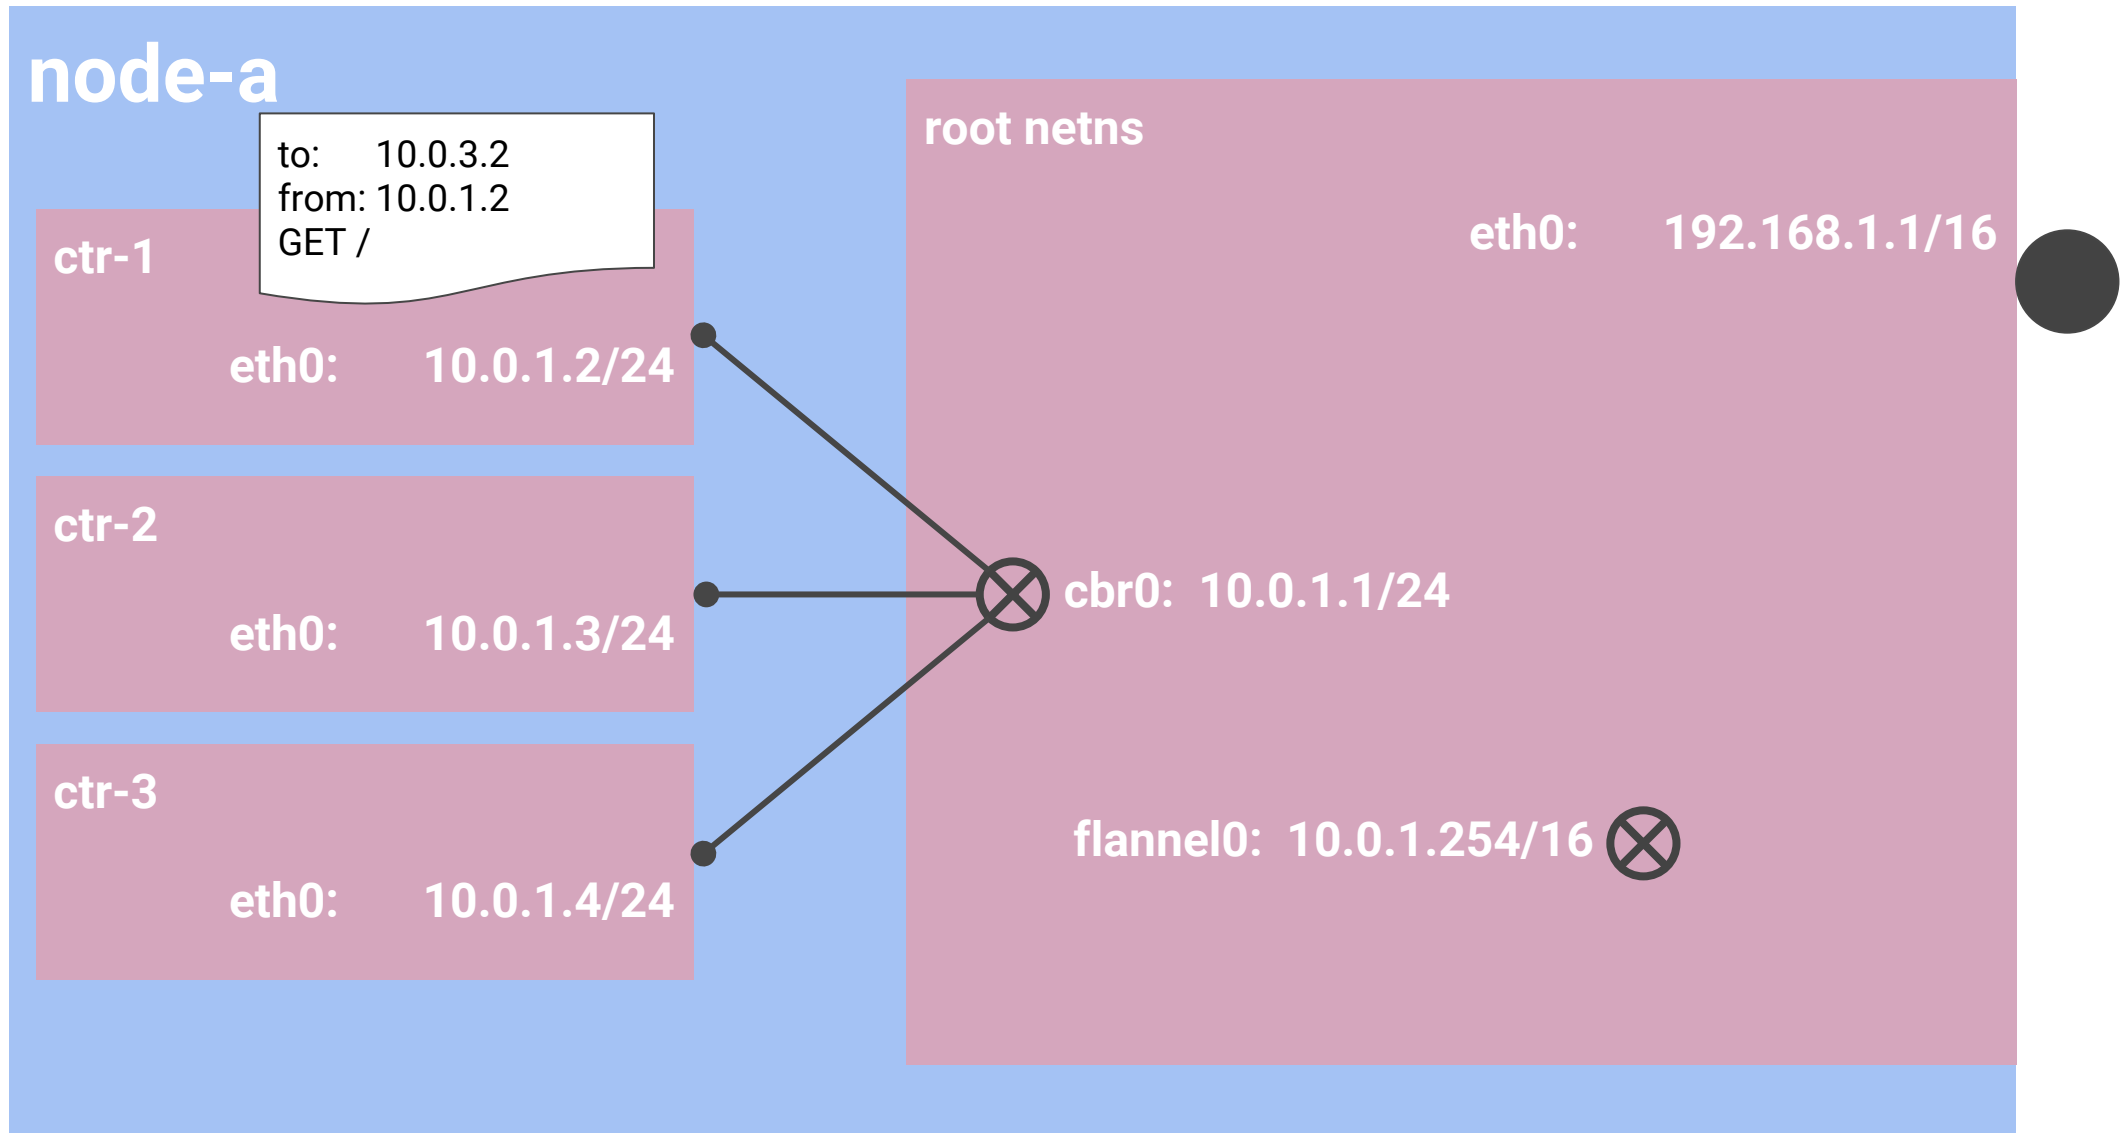

A: When nothing else works, *or* when you have specific reasons to want it (e.g. the added value of management)

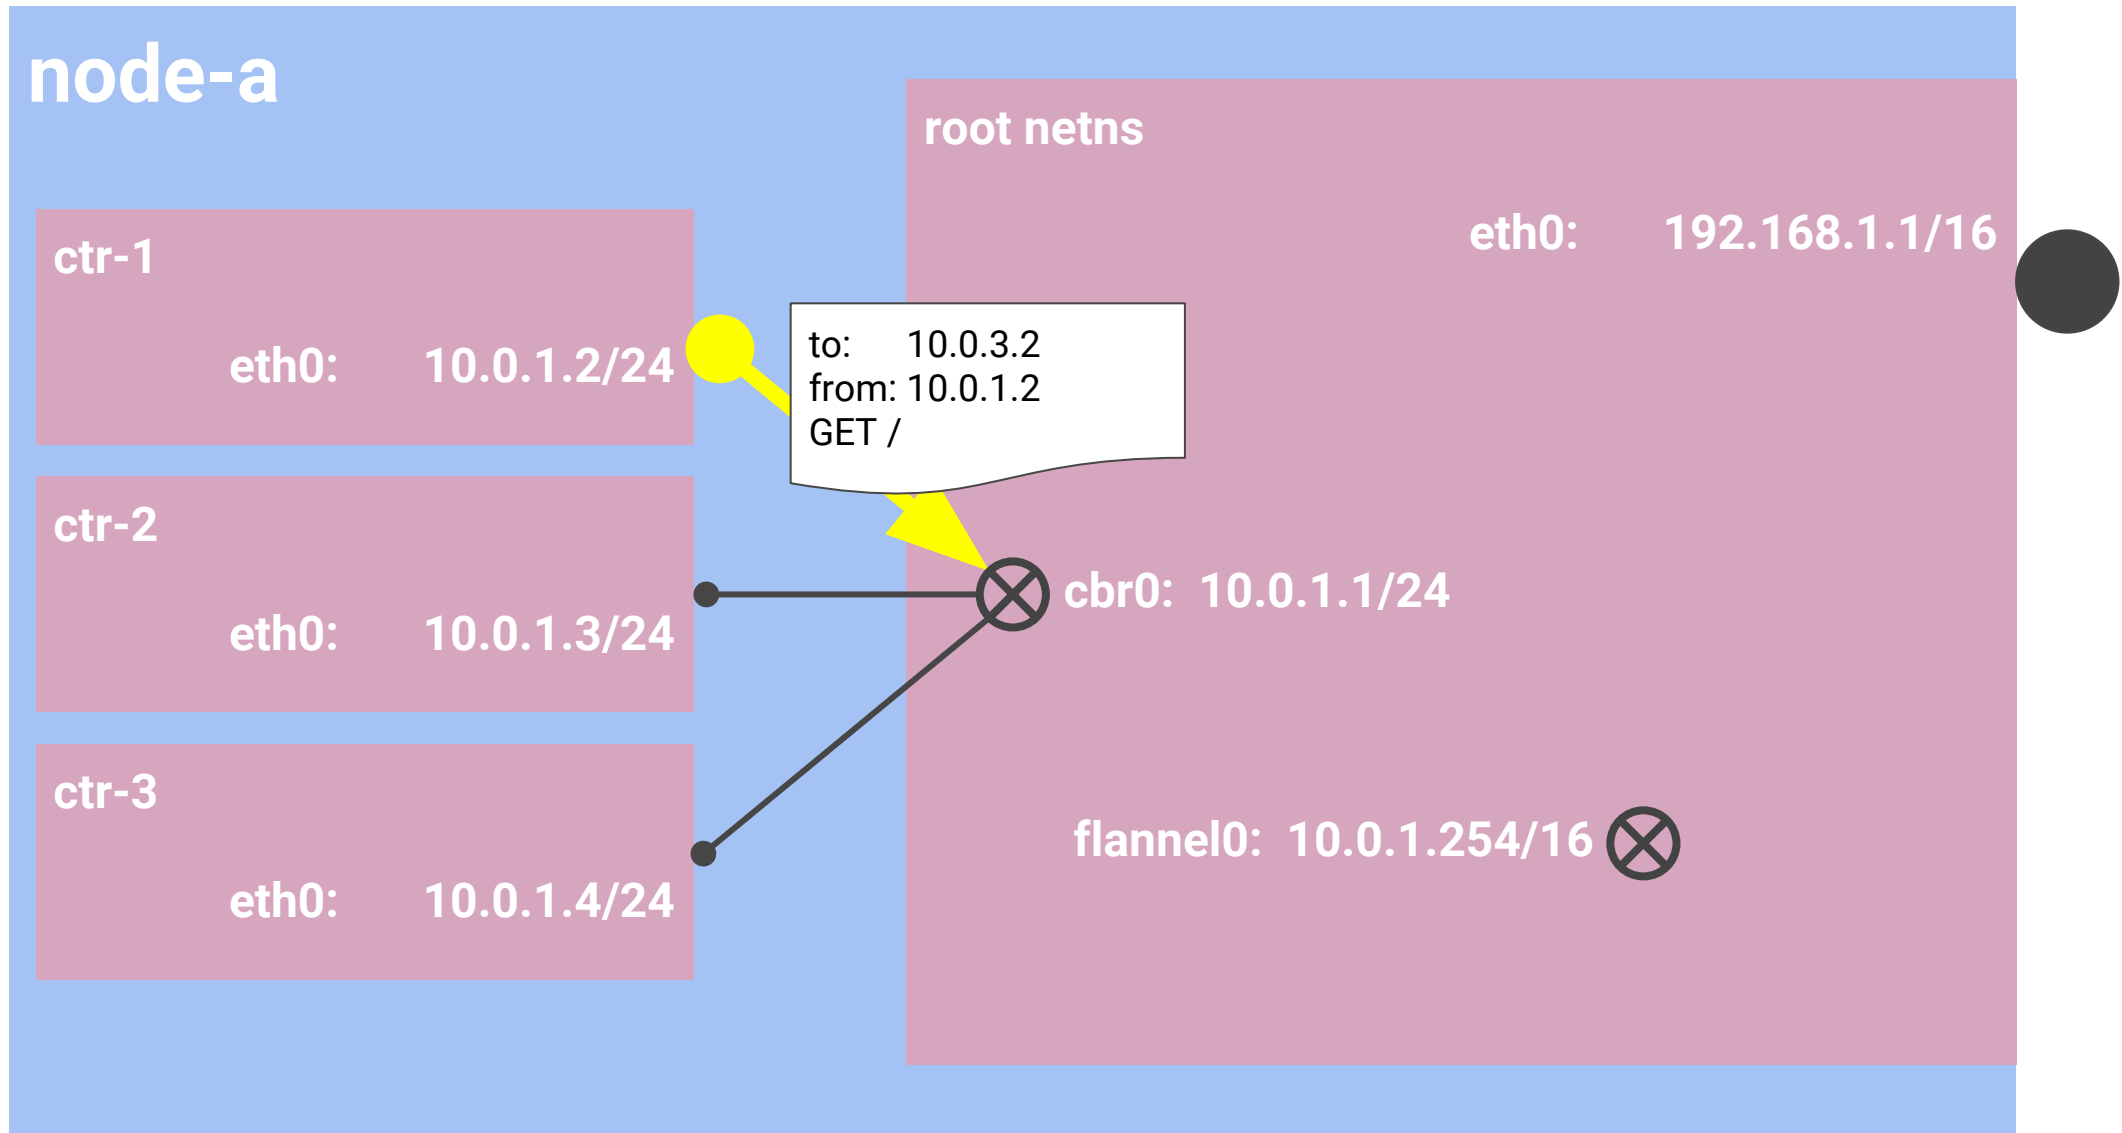

# Overlay (e.g. flannel, weave)

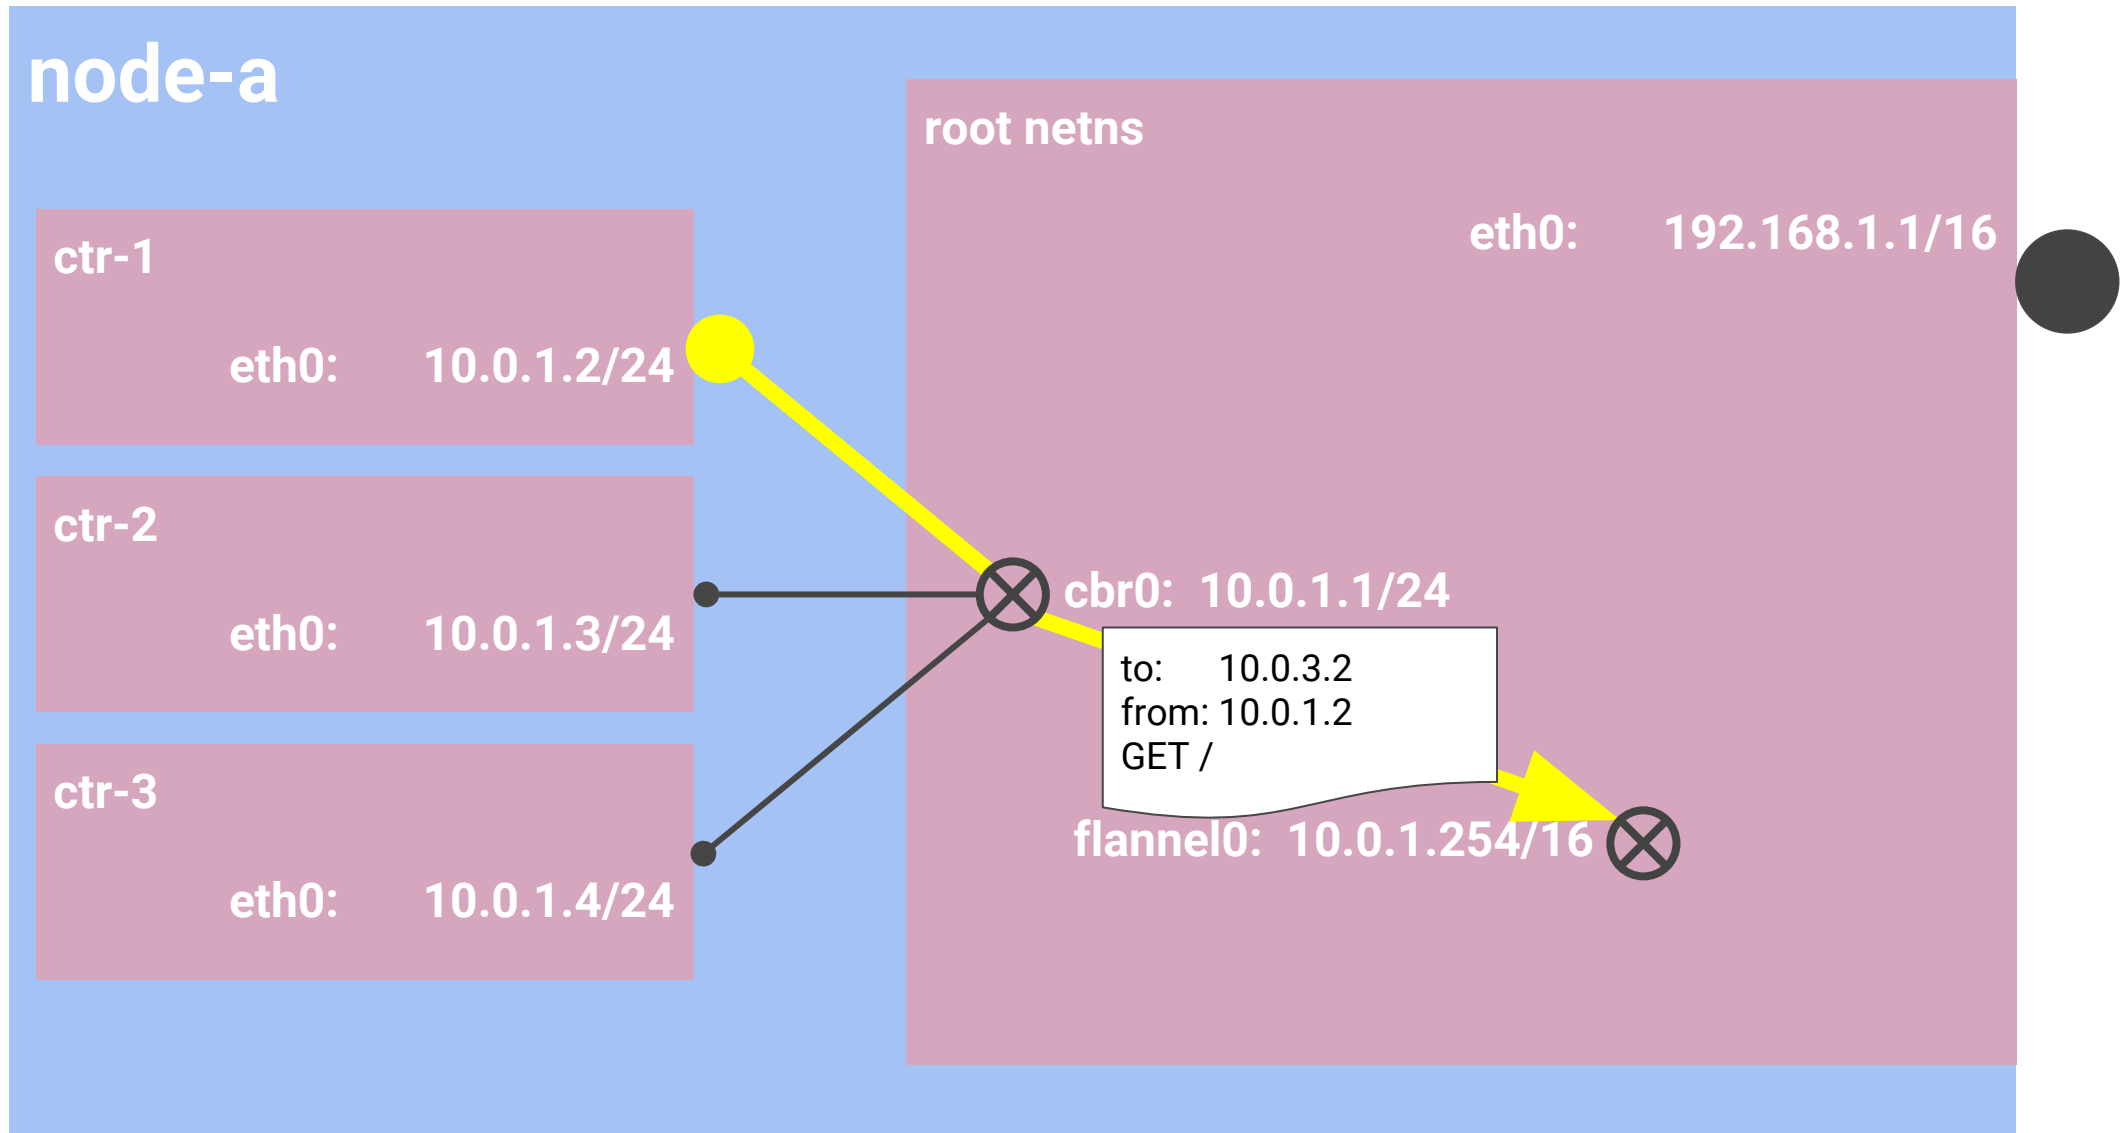

# Overlay (e.g. flannel, weave)

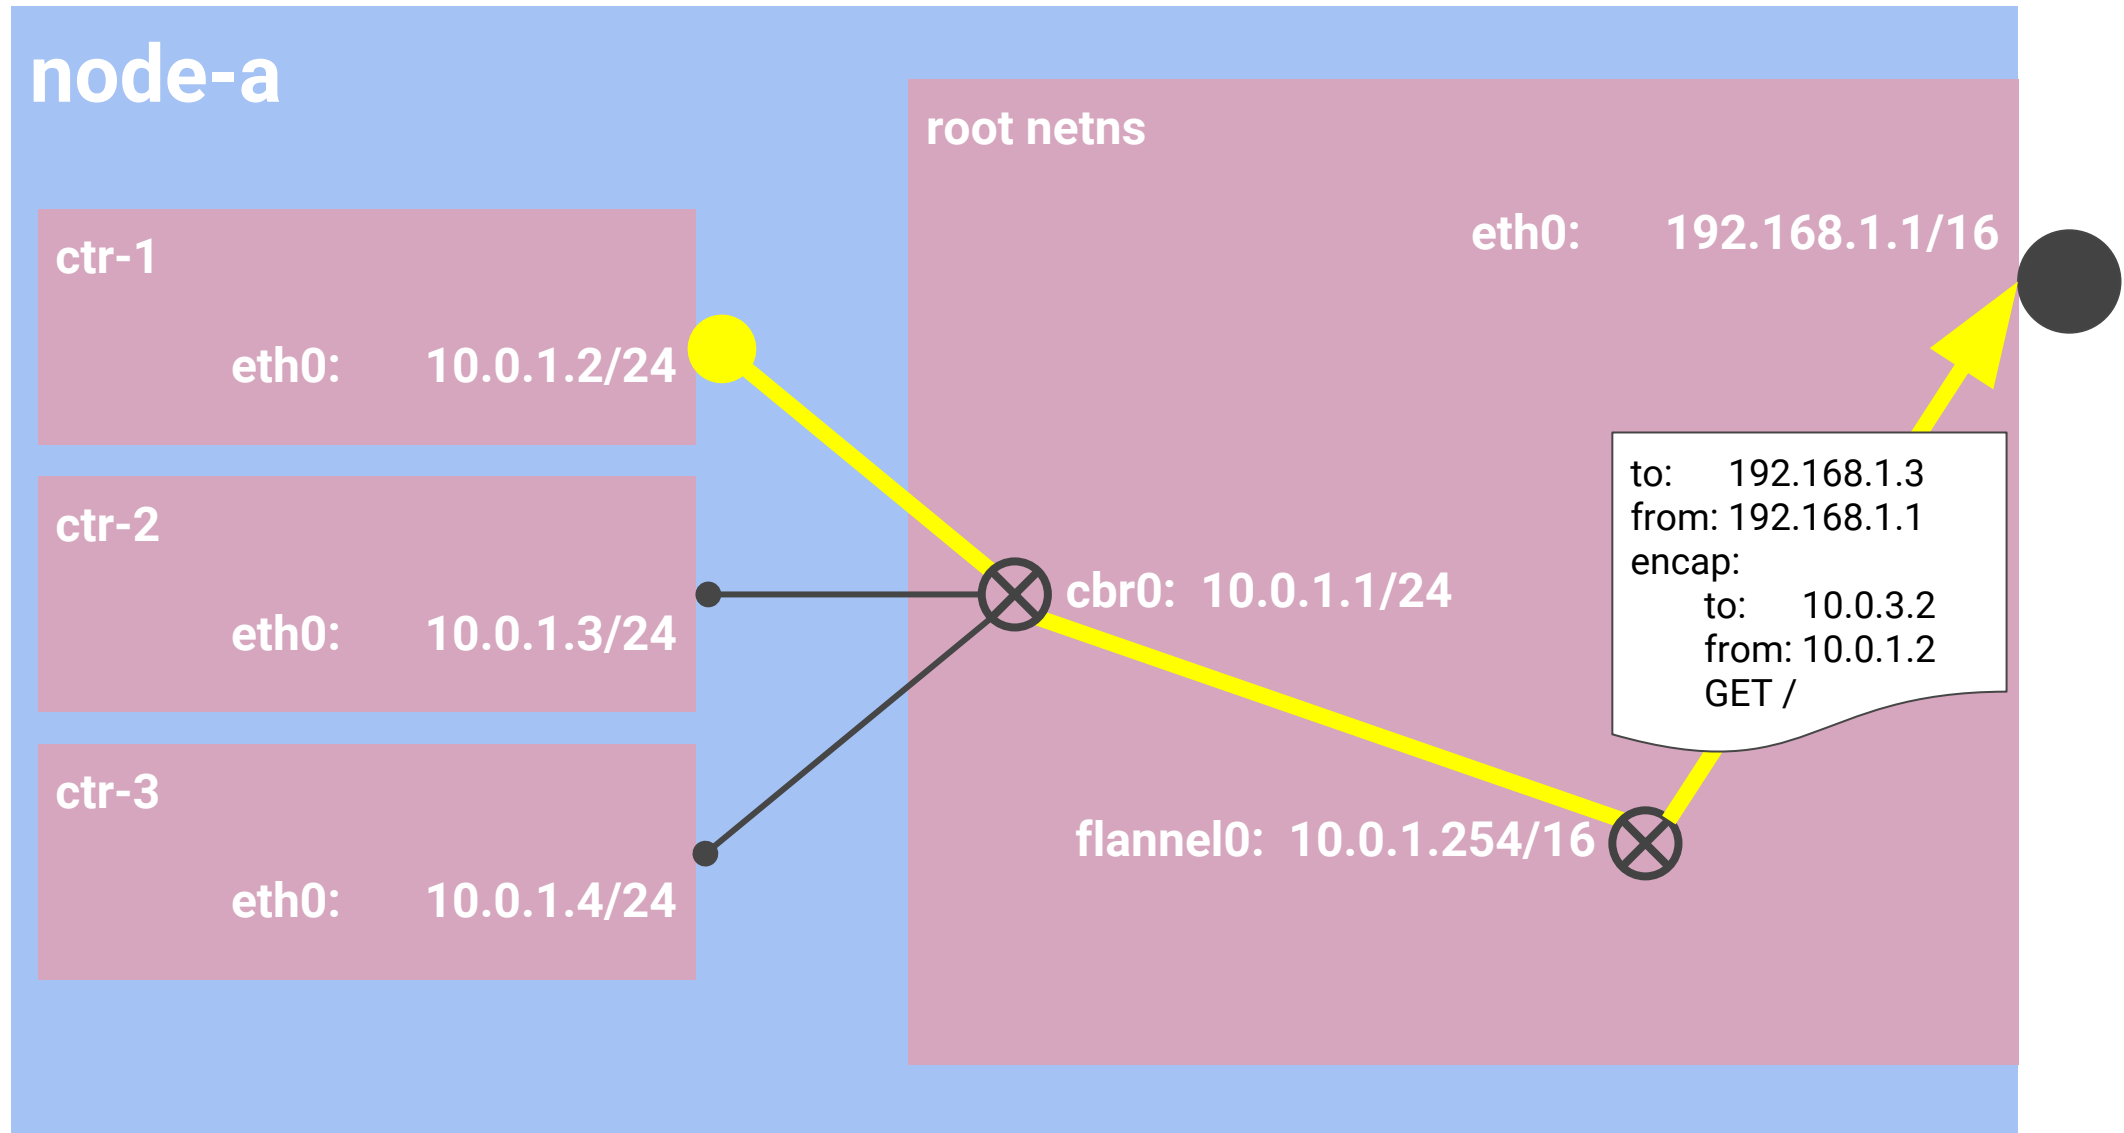

# Overlay (e.g. flannel, weave)

# Overlay (e.g. flannel, weave)

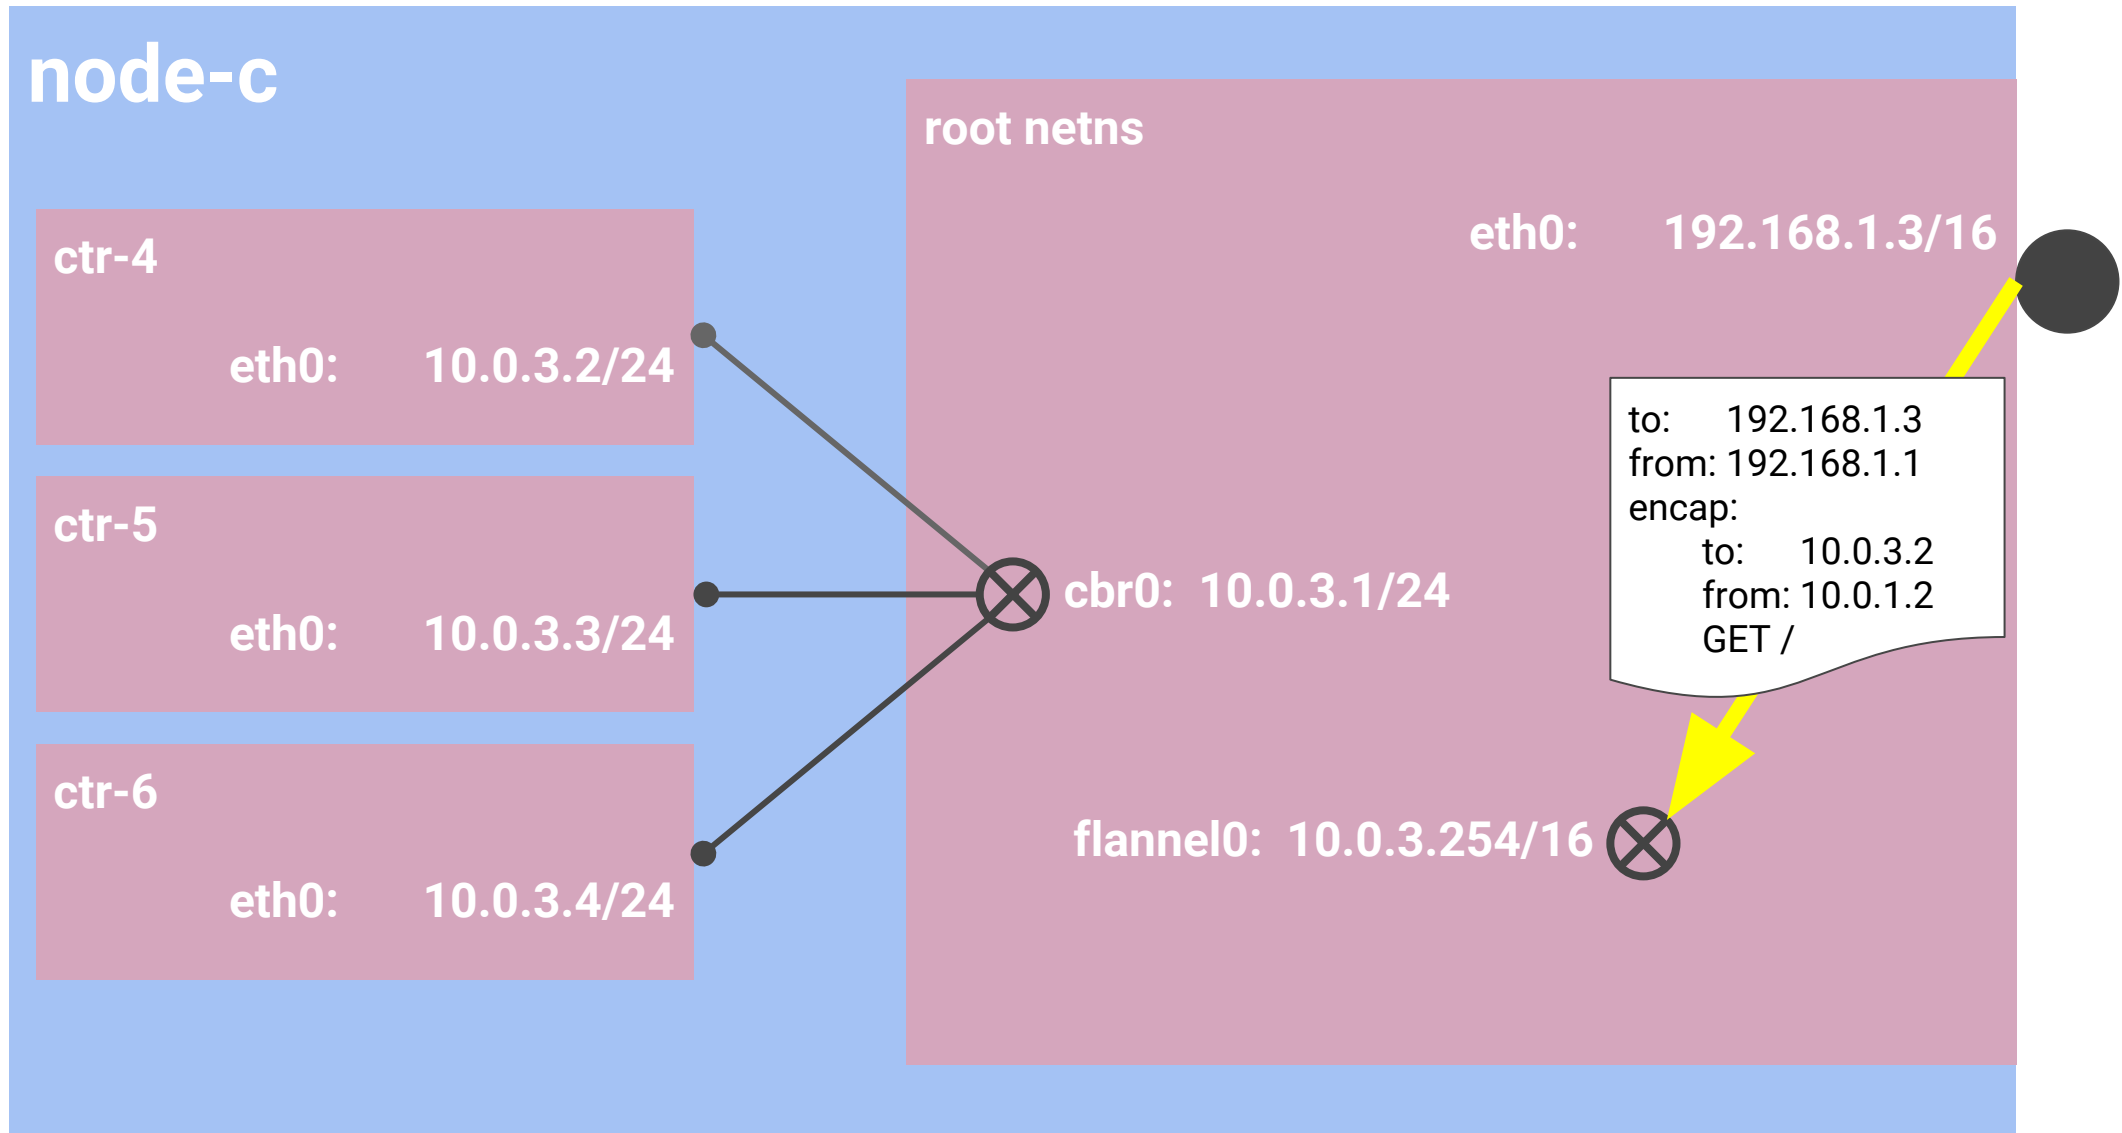

# Overlay (e.g. flannel, weave)

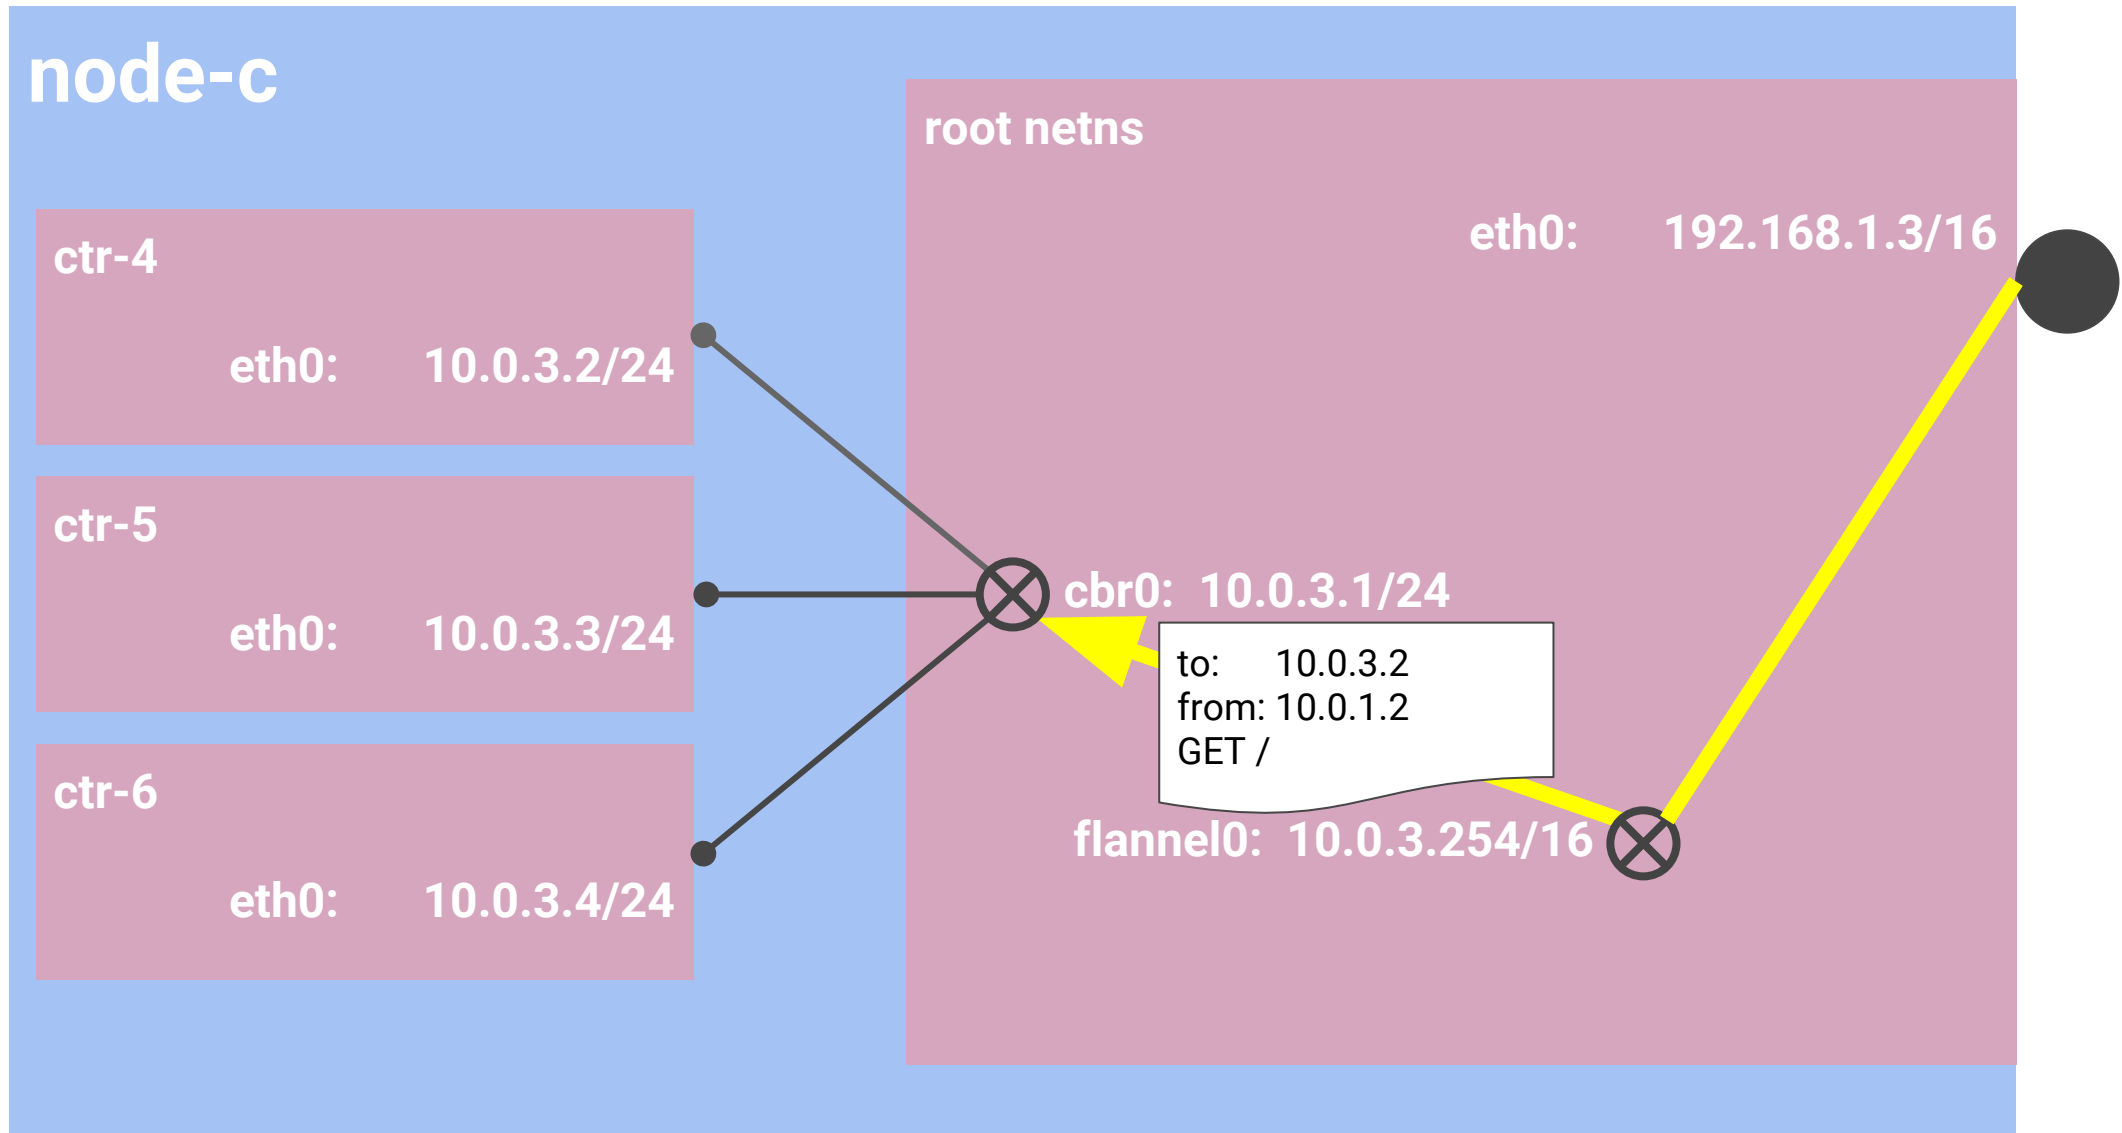

# Overlay (e.g. flannel, weave)

# Overlay (e.g. flannel, weave)

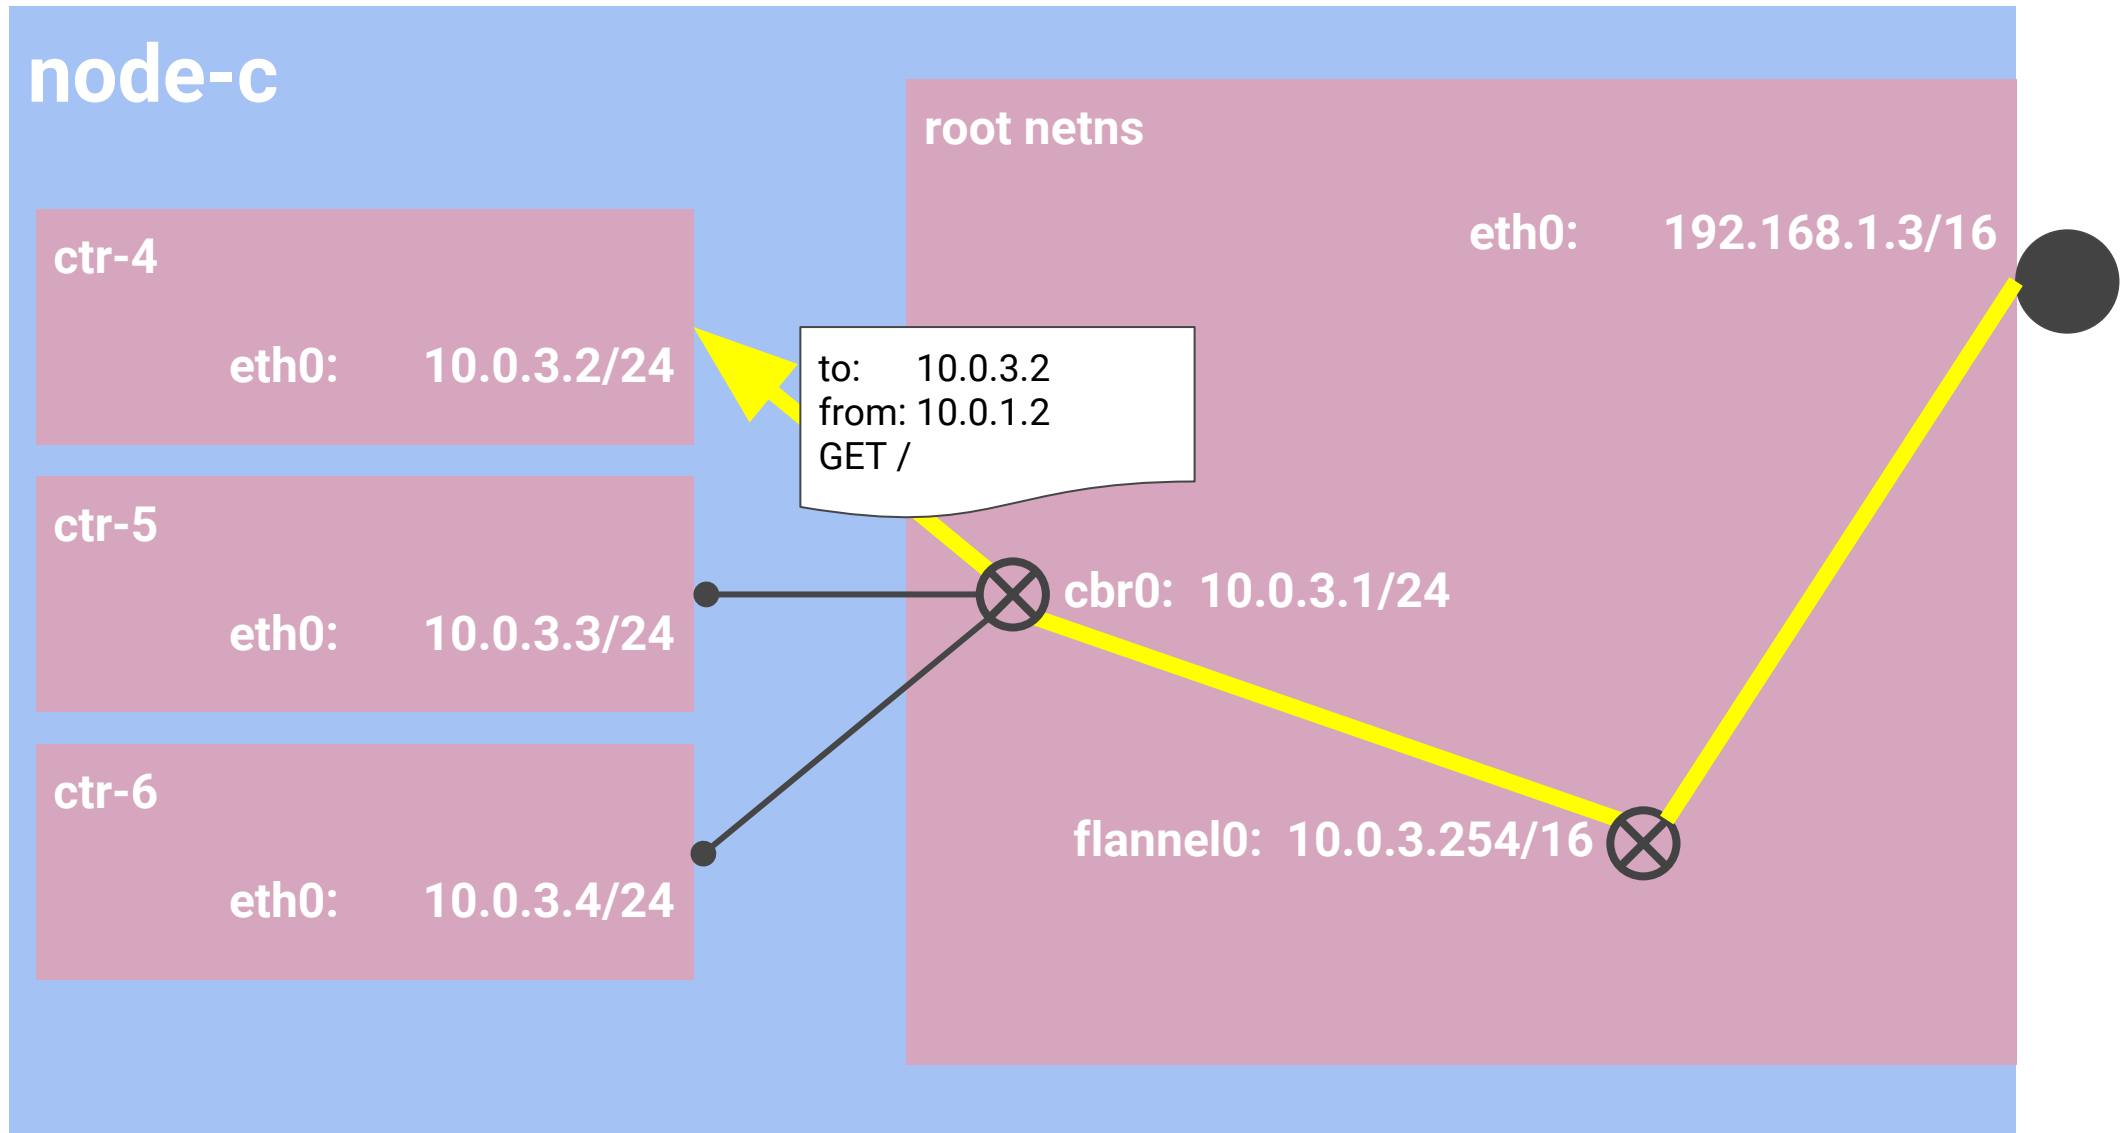

# Overlay (e.g. flannel, weave)

# Overlay (e.g. flannel, weave)

# Overlays - the hard part

# Overlay (e.g. flannel, weave)

# Overlay (e.g. flannel, weave)

# Overlay (e.g. flannel, weave)

# Overlay (e.g. flannel, weave)

We need a bridge between the  
physical and overlay networks...

# We need a bridge between the physical and overlay networks...

- could: route to nodes
- could: route to 1 or more bridge machines
- could: run flannel on client machines

# We need a bridge between the physical and overlay networks...

- could: route to nodes
- could: route to 1 or more bridge machines
- could: run flannel on client machines
- see “When should I use an overlay?”
